PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer** with an **AWS Cloud** specialization and hands-on experience in **Software Development**, Backend Development, **Cloud Computing**, and **DevOps** Engineering. Skilled in building scalable, production-ready applications using the **MERN stack**, **React.js**, **Node.js**, Express.js, **Python**, Django REST Framework, Flask, **MongoDB**, **MySQL**, PostgreSQL, and **REST APIs**. Proficient in **JWT** Authentication, OAuth 2.0, **CI/CD pipelines**, **Docker**, Kubernetes, and **AWS** cloud deployment (EC2, IAM, CodePipeline, CodeBuild, Auto Scaling). Strong background in debugging, bug-fix implementation, and Agile collaboration, with a track record of delivering high-quality, well-tested software solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, HTML5, CSS3, SQL
- **Frontend Development:** React.js, Redux Toolkit, Tailwind CSS, Material UI, GSAP, Flutter
- **Backend Development & APIs:** Node.js, Express.js, Django REST Framework, Flask, FastAPI, REST API Development, Microservices Architecture, Business Logic Development
- **Databases:** MongoDB, MySQL, PostgreSQL, Redis, Sequelize ORM, Database Design & Query Optimization
- **Cloud & DevOps:** Amazon Web Services (EC2, IAM, CodeBuild, CodePipeline, Auto Scaling), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD, Infrastructure as Code
- **Authentication & Security:** JWT Authentication, OAuth 2.0, RBAC, IAM Policies & Roles
- **AI & Data:** Machine Learning, Scikit-learn, NumPy, Pandas, Feature Engineering, Predictive Analytics, Statistical Analysis
- **Practices & Tools:** Agile Methodology, SDLC, OOP, Data Structures & Algorithms, Debugging & Troubleshooting, Bug Fixing, Code Review, Git, Postman, VS Code, Team Collaboration

PROFESSIONAL EXPERIENCE

Software Developer Intern | ***Softnotions Technologies Private Ltd*** **Aug 2026 – Present**

- Collaborating with a cross-functional development team on a live, production-grade company project, contributing to feature delivery within Agile sprints and version-controlled workflows.
- Analyzing reported software bugs and performing root-cause debugging, implementing effective bug-fix solutions to improve application stability, reliability, and performance.
- Designing and implementing new feature enhancements and functional modules, extending the existing codebase in line with project requirements, coding standards, and best practices.
- Participating in code reviews, technical discussions, and testing/debugging cycles to ensure high-quality, maintainable, and scalable software delivery.

Full-Stack Developer Intern | *ICT Kerala* **Dec 2024 – Jan 2025**

- Developed a scalable MERN-based Job Portal capstone project featuring role-based dashboards for job seekers, employers, and administrators.
- Designed modular frontend and backend components using React.js, Redux Toolkit, Express.js, and MongoDB following MVC architecture and Agile development practices.
- Implemented secure JWT authentication, Cloudinary-based cloud file management, and optimized database operations to enhance application performance.
- Automated CI/CD deployment workflows using Docker and GitHub Actions, enabling streamlined, containerized application delivery.

PROJECTS

WayHub — Transit Management System *MERN | Socket.io | MongoDB | JWT | RBAC*

- Developed a full-stack MERN transit platform featuring transport scheduling, real-time tracking, courier services, and online ticket booking.
- Implemented secure REST APIs, geospatial route optimization, and real-time updates using Socket.io, MongoDB, JWT, and RBAC.
- Delivered features iteratively following Agile methodologies with continuous testing and performance optimization.

FeedBack Analytics Platform — TCS iON Course Project *React | Node.js | MySQL | Sequelize | Docker | JWT*

- Developed a centralized feedback and analytics platform as the capstone project for the TCS iON Job Achiever program, enabling teams to collect user feedback and analyze trends through interactive dashboards.
- Built a full-stack application using React.js, Express.js, MySQL, and Sequelize ORM, with JWT-based authentication, RBAC, and Dockerized deployment.

AWS Cloud Deployment Project — MCA Specialization *AWS EC2 | IAM | CodeBuild | CodePipeline | Auto Scaling*

- Deployed a full web application (HTML/CSS, Python, Node.js) on AWS EC2 with GitHub-connected automated deployment via AWS CodePipeline and CodeBuild.
- Configured IAM users, roles, and policies for least-privilege access; set up Auto Scaling groups for availability; applied cloud-native DevOps concepts including infrastructure permissions and deployment automation.

Personal Budget Predictor — AI Finance App *Python | Flask | Scikit-learn | React.js | NumPy | Pandas*

- Flask REST API that analyzes spending patterns and forecasts budgets using Scikit-learn regression with cross-validation (MAE/RMSE evaluation); React.js dashboard for income vs. expenditure visualisation with ~25% improved forecast precision through feature engineering.

EDUCATION

Master of Computer Applications (MCA) – Cloud Specialization (AWS) 2025 – Present
LEAD College, Palakkad, Kerala

Bachelor of Computer Applications (BCA) 2025
Guru Dev Arts & Science College, Kannur, Kerala | 65%
