PROFILE SUMMARY

MCA graduate with an AWS Cloud specialization and a background in building full-stack web applications. Worked across the MERN stack, REST APIs, JWT authentication, real-time systems, and cloud deployments using AWS (EC2, Auto Scaling, CodePipeline) and Docker. Experienced in designing scalable backend architectures, integrating third-party APIs, and optimizing application performance for production environments. Proficient in implementing CI/CD pipelines, containerized deployments, and collaborative development workflows using Git and Agile methodologies .

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, HTML5, CSS3
Frontend: React.js, Redux Toolkit, Tailwind CSS, Material UI, GSAP
Backend: Node.js, Express.js, Django REST Framework, Flask
Databases: MySQL, PostgreSQL, MongoDB, Redis, Sequelize ORM
Cloud & DevOps: AWS (EC2, IAM, CodeBuild, CodePipeline, Auto Scaling), Docker, GitHub Actions, CI/CD, Jenkins.
Auth & Security: JWT, OAuth 2.0, RBAC, IAM Policies & Roles
Tools: Git, Postman, VS Code
ML & Data: Scikit-learn, NumPy, Pandas, Feature Engineering

INTERNSHIP

Full-Stack Developer Intern — ICT Kerala	Dec 2024 – Jan 2025
- Developed a full-stack MERN-based Job Portal as an internship capstone project, featuring role-based dashboards for job seekers, employers, and administrators. - Designed scalable frontend and backend modules using React, Redux Toolkit, Express.js, and MongoDB, following MVC architecture and best development practices. - Implemented secure JWT-based authentication, cloud file management with Cloudinary, and optimized database operations to enhance application performance. - Automated deployment workflows using Docker and GitHub Actions, enabling streamlined CI/CD and containerized application delivery.	

PROJECTS

WayHub — Transit Management System	MERN Socket.io MongoDB JWT RBAC
- Developed a full-stack MERN transit platform featuring transport scheduling, real-time tracking, courier services, and online ticket booking. - Implemented secure REST APIs, geospatial route optimization, and real-time updates using Socket.io, MongoDB, JWT, and RBAC. - Delivered features iteratively following Agile methodologies with continuous testing and performance optimization.	
FeedBack Analytics Platform — TCS iON Course Project	React Node.js MySQL Sequelize Docker JWT
- Developed a centralized feedback and analytics platform as the capstone project for the TCS iON Job Achiever program, enabling teams to collect user feedback and analyze trends through interactive dashboards. - Built a full-stack application using React.js, Express.js, MySQL, and Sequelize ORM, with JWT-based authentication, RBAC, and Dockerized deployment.	
AWS Cloud Deployment Project — MCA Specialization	AWS EC2 IAM CodeBuild CodePipeline Auto Scaling
- Deployed a full web application (HTML/CSS, Python, Node.js) on AWS EC2 with GitHub-connected automated deployment via AWS CodePipeline and CodeBuild. - Configured IAM users, roles, and policies for least-privilege access; set up Auto Scaling groups for availability; applied cloud-native DevOps concepts including infrastructure permissions and deployment automation.	
Personal Budget Predictor — AI Finance App	Python Flask Scikit-learn React.js NumPy Pandas
Flask REST API that analyzes spending patterns and forecasts budgets using Scikit-learn regression with cross-validation (MAE/RMSE evaluation); React.js dashboard for income vs. expenditure visualisation with ~25% improved forecast precision through feature engineering.	

EDUCATION

Master of Computer Applications (MCA) — Cloud Specialization (AWS)	2025 – Present
LEAD College, Palakkad, Kerala	
Bachelor of Computer Applications (BCA)	Completed : 2025 65%
Guru Dev Arts & Science College, Kannur, Kerala	

ACHIEVEMENTS & PUBLICATIONS

- Selected for the second phase of a National Robotics Hackathon — competing against teams from across Kerala.
- Published a book chapter on Digital Marketing in academic literature.
